Professional Summary

React Frontend Developer with 2.5 years of experience building scalable, high-performance web applications using React, TypeScript, and Next.js. Proficient in translating Figma designs into responsive, reusable UI components, integrating REST APIs, and optimizing Web Vitals. Experienced in Agile/Scrum environments with strong command of Git branching strategies, code reviews, and CI/CD workflows.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Next.js (SSR, SSG, ISR, App Router), Redux, Context API, Zustand
- **Computer Science Fundamentals:** Data Structures, Algorithms
- **Styling:** Tailwind CSS, SCSS/SASS, Material UI, Shadcn UI, Responsive Design, Mobile-First Design
- **API & Integration:** RESTful APIs, API Integration, Axios, JWT Authentication
- **Backend Exposure:** Node.js, Express.js, SQL, MongoDB
- **Real-Time Communication:** WebSockets, Socket.IO, Live Chat, Video Calling
- **Performance & Optimization:** Front-End Performance Optimization, Code Splitting, Lazy Loading, Web Vitals, Debugging, Reusable Components
- **Tools & Workflow:** Git, GitHub, Bitbucket, Claude Code, JIRA, Postman, Chrome DevTools, Webpack, Vite, Slack
- **CI/CD & Deployment:** CI/CD Pipelines, AWS S3

Experience

Medibuddy

Application Engineer – 1 (React Frontend Developer)

May 2025 – Oct 2025

Bengaluru, Karnataka

- Owned end-to-end delivery of user-facing features for DocsApp, a medical insurance platform — from estimation and UX alignment to implementation using **React.js**, **JavaScript** (ES6+), **HTML5**, and **CSS3**, ensuring responsive design across devices.
- Updated and optimized complex business logic across Node.js, Express.js, and SQL backend systems to support evolving business requirements.
- Redesigned and maintained MER PDF generation templates in a Node.js backend repository, building layouts using **HTML** templates + **CSS** and integrating dynamic form data using **Dot.js**.
- Resolved security bugs including XSS prevention and restricted access to sensitive internal resources; collaborated with backend and QA teams across Agile sprint cycles.
- Deployed and managed production and staging web application environments using **AWS S3**, ensuring high availability and reliable static asset hosting.

Chingari

Software Development Engineer - 1 (React Frontend Developer)

Jun 2023 – May 2025

Bengaluru, Karnataka

- Led end-to-end ownership of scalable web application features — scoping, estimation, and coordination with product and design — using **React.js**, **Next.js**, **TypeScript**, and **JavaScript** (ES6+), following modern component patterns and React Hooks.
- Translated Figma UI/UX designs into pixel-perfect, responsive components using **Tailwind CSS** and **SCSS/SASS**, ensuring consistent mobile-first design across devices.
- Integrated REST APIs with authentication flows using JWT-based authorization and secure request handling.
- Delivered a high-performance landing page for AstroLive by applying performance optimization techniques — code splitting, lazy loading, and SEO — significantly improving load time and user experience.
- Built reusable component library aligned with the design system using React Storybook; maintained code quality through code reviews, PR discussions, and Agile/Scrum ceremonies using **Git** and Bitbucket.
- Implemented real-time video calling, chat, and gifting features enabling consumers to connect with creators and astrologers using socket.io for low-latency communication.
- Integrated GegoCloud (video SDK/service) to handle scalable and reliable live audio/video streaming sessions with optimized connection stability.

Education

Presidency University

Bachelor of Technology (B.Tech), Electronics and Communication Engineering

Aug 2018 – Jul 2022
